

ABOUT ME

I am an independent computer programmer with over 25 years of professional experience, most notably in the manufacturing industry. I am the owner and operator of [Prismatic Realms, Inc.](#) I have a heart and mind for games and game development, which is my primary focus professionally. I am highly technical, a strong logical problem solver, a perfectionist to a fault and very adept at learning and using new languages, software and tools. I am also an avid game player and thoroughly enjoy visually rich media experiences.
